

In the Specification:

Please amend paragraph [0015], as follows:

[0015] FIG. 2 is a partial perspective view of a container closure cap system including a container closure cap having a clip member with a flared end according to the present invention.

Please amend paragraph [0023], as follows:

[0023] FIGS. 12 is a perspective view of an alternate embodiment of the container closure cap system according to the present invention.

Please amend paragraph [0027], as follows:

[0027] The container closure cap 30 is illustratively matingly connected to the container 20 to engage the sidewalls 24 of the container above the lip 25. The container closure cap 30 also covers the opening 28 in the top surface 26 of the container 20.

Please amend paragraph [0043], as follows:

[0043] The embodiment of the container closure cap 30" illustrated in FIGS. 10-11 includes an upper cover members 34" having a push-pull closure. The upper cover members 34" may be axially moved to allow access to the contents within a container. The other elements of this embodiment of the container closure cap 30" are similar to those of the first embodiment, are labeled with double prime notation, and require no further discussion herein.
